(54) Title: A METHOD FOR PREPARING MODIFIED RELEASE PHARMACEUTICAL COMPOSITIONS

(57) Abstract: A method for the preparation of a pharmaceutical particulate composition for modified release of one or more ther-
apeutically, prophylactically and/or diagnostically active substances, the method involving spraying of a composition comprising an
oily material on a solid composition in order to subject the solid composition to a controlled agglomeration process, whereby individ-
ual particles are aggregated into agglomerates in a controlled manner and a relatively small particle size and particle size distribution
is obtained, the particulate composition comprising a sufficient amount of at least one release-rate modifying substance to provide a
modified release of the active substance sufficient to provide duration of therapeutic, prophylactic and/or diagnostic effect of at least
about 2 hours when the composition is exposed to an aqueous environment.
